Professional Summary

Computer Science graduate with hands-on experience in AI/ML development, data analysis, and software engineering. Proficient in Python, SQL, and modern ML frameworks including TensorFlow and PyTorch. Built and deployed end-to-end AI applications using LLMs, RAG pipelines, and REST APIs. Published researcher with 2 international papers. Strong communicator and collaborative team player with a demonstrated ability to work in cross-functional teams, manage tasks independently, and deliver solutions under deadlines. Quick learner with a proven ability to adapt to emerging technologies and apply them to solve real-world problems.

Education

10/2021 – 06/2024
Hyderabad, India

Bachelor of Technology in Computer Science and Business Systems
Gokaraju Rangaraju Institute of Engineering and Technology
CGPA: 7.59

08/2025
Hyderabad, India

Data Science
Innomatics Research Science
Coursework in Python, Statistics, Data Analysis, SQL + PowerBI, ML, DL, GenAI, NLP, Computer Vision

Experience

Gen-AI Internship, Innomatics research labs, Hyderabad

Nov 2025 - Feb 2026

- Developed production-ready **generative AI** solutions leveraging **LLMs** and **Prompt Engineering**, improving response accuracy, output quality, and overall system reliability.
- Engineered **AI-powered** applications for automated text generation and summarisation using **Python** and **OpenAI APIs**, reducing manual content processing effort by ~40% and enhancing **workflow** automation.
- Architected and deployed intelligent chatbots and content generation systems, **streamlining** repetitive tasks and boosting team productivity by ~35% through end-to-end AI automation.
- Integrated **large-scale** AI models into existing business workflows and applications, improving process efficiency, scalability, and decision-making capabilities across operations.

Projects

AI Ad Diagnostic Agent, Python, FastAPI, LangChain, LLMs, RAG, Prompt Engineering

- Developed an AI-powered ad diagnostic agent to analyse advertising content and deliver actionable insights for campaign optimisation and performance improvement.
- Built an agentic workflow using **LLMs**, **LangChain**, and **RAG** to automatically identify ad weaknesses and generate data-driven recommendations, reducing ad review time by ~50%.
- Integrated Prompt Engineering techniques and AI agents to automate ad analysis, feedback generation, and end-to-end decision-making processes.
- Designed and deployed **REST APIs** using **FastAPI**, enabling seamless interaction between the AI engine and client applications.

Real-Estate Predictor using Machine Learning, Python, EDA (pandas, numpy, scikit-learn)

- Developed a Python-based **Real Estate Price Prediction** application targeting properties valued between **₹10 Lakhs and ₹65 Crores** across Hyderabad and Mumbai.
- Trained **Regression Models** on **90,000+ property listings**, achieving **91% prediction accuracy** ($R^2 = 0.91$) and ensuring robust performance across diverse property types.
- Performed end-to-end Exploratory Data Analysis (**EDA**) and **Feature Engineering** to identify key price-influencing factors and improve prediction accuracy.
- Built and optimised **Linear Regression**, **Random Forest**, and **Gradient Boosting** models using **Hyperparameter Tuning**, delivering accurate and reliable property price predictions.

Technical Skills

Programming Languages

- C++, Python, SQL

Libraries & Frameworks

- NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Keras, Matplotlib, Seaborn, Hugging Face, LangChain, React.js

SQL + Power BI

- SQL Queries, Joins, Subqueries, Aggregate Functions, Window Functions, CRUD Operations • Dashboard Development, Visualization, Power Query, DAX, Data Modeling, KPI Tracking & BI Reporting

Excel + Databases

- Pivot Tables, Charts, VLOOKUP, HLOOKUP, XLOOKUP, Conditional Formatting, Formulas, Data Validation & Reporting
- MySQL, NoSQL

Developer Tools

- VS Code, Git, GitHub, Docker, Google Colab, Jupyter Notebook, Postman, Flask, FastAPI, Linux, N8N

Machine Learning

- Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Deep Learning

- Neural Networks, CNN, RNN, LSTM, GRU, Transfer Learning, Model Optimization, Transformers

Computer Vision

- OpenCV, Image Processing, Image Classification, Object Detection, Image Segmentation, Face Detection, OCR, Feature Extraction, YOLO

Natural Language Processing (NLP)

- Text Preprocessing, Tokenization, Lemmatization, TF-IDF, Sentiment Analysis, Text Classification, NER

Gen-AI

- LLMs (GPT-4, GPT-5, Gemini, Claude, LLaMA), LangGraph, RAG Prompt Engineering, AI Agents, Embeddings, Vector Databases (FAISS, ChromaDB), OpenAI API, Function Calling, DALL-E

PUBLICATIONS/RESEARCH PAPERS

06/2025	A* Search and Depth-Limited Search (DLS), — <i>E3S Web of Conferences</i> • Conducted a comparative case study of A* Search and Depth-Limited Search (DLS) by analysing key performance metrics including nodes explored (A*: 5, DLS: 13), time and space complexity, and path optimality, highlighting the efficiency of heuristic-based approaches. • Evaluated trade-offs between heuristic-driven exploration and depth-limited search across graph scenarios and visualised algorithm behaviour using Python graph libraries to demonstrate node expansion and optimal path identification.
05/2024	Medical Domain Identification using NLP, — <i>AIP Conference Proceedings</i> • Developed an NLP-driven Classification System to categorise clinical transcripts into relevant medical domains. • Implemented TF-IDF Vectorisation and PCA for efficient feature extraction and dimensionality reduction. • Achieved high classification accuracy using a Random Forest model trained on the Kaggle Medical Transcriptions Dataset. • Deployed the model with an optimised inference pipeline, enabling Real-Time Medical Domain Prediction for unseen transcripts.

Certifications

Gen-AI Internship Innomatics Research Labs (2026) Data Science with python Nasscom (2025)	Cybersecurity Internship AICTE (2025) Virtual Reality & Augmented Reality Hashing company(2022)	Big Data Computing NPTEL (2024)
